

JEBASTIN MICHAEL RAJ. M

Senior Full Stack Developer | .NET / React /Hangfire /Azure / SQL

jebastinmichealraj@gmail.com | +91 934 563 5274 | Kovilpatti, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer with 4+ years of experience** designing, building, and maintaining enterprise-grade web applications. Proven expertise across the entire development lifecycle — from database architecture and RESTful API design to responsive front-end UIs — using **C#, ASP.NET MVC, ASP .NET Core, Hangfire, React, Dapper and MS SQL Server**. Experienced working in Agile/Scrum teams, delivering scalable solutions on **Azure**, and collaborating cross-functionally with product owners and business stakeholders.

TECHNICAL SKILLS

Languages:	C#, JavaScript (ES6+), T-SQL, HTML5, CSS3
Frameworks:	ASP.NET MVC, .NET Core 8.0+, ASP .NET Core, Hangfire, React.js, jQuery, Bootstrap, Ajax
Web & API:	RESTful APIs, Web API, Razor Pages, JSON, XML
Databases:	MS SQL Server 2016/2017/19/2020, Azure Managed Instance, Stored Procedures, Views, Triggers
Cloud & DevOps:	Microsoft Azure, GitHub, SourceTree, CI/CD pipelines
Tools & IDEs:	Visual Studio 2019, SSMS, Postman

PROFESSIONAL EXPERIENCE

Senior Software Developer

1. Medcom Benefit Solutions — Jacksonville, Florida, USA (Remote)

September 2022 – Present

Medcom is a leading provider of health benefits administration solutions, serving 5,000+ U.S. employers. Contributed as a core Full Stack Developer on the Medcom Portal — a health compliance sales and data management platform used by employers, agencies, brokers, and company staff.

- Engineered and maintained full-stack features for the **Medcom health compliance portal** using C#, ASP.NET MVC, React.js, and MS SQL Server 2019.

- Designed and optimized complex **SQL Stored Procedures, Views, and Triggers** to support Staff and Agency Maintenance modules, improving query performance.
- Built and consumed **RESTful Web APIs** (.NET Core) to integrate front-end dashboards with back-end business logic and third-party data sources.
- Developed responsive front-end dashboards and UI components using **React.js, JavaScript, jQuery, Bootstrap, and Ajax**; ensured cross-browser compatibility.
- Translated business requirements into **technical specifications** and maintainable code, reducing bug resolution time through strong debugging practices.
- Identified and resolved **code-based security and performance vulnerabilities**, maintaining high application reliability.
- Managed codebase via **GitHub and SourceTree** across multiple build environments (Dev, QA, Production).
- Participated actively in **Agile/Scrum ceremonies** (daily standups, sprint planning, retrospectives), collaborating closely with Product Owner and QA teams.
- Supported ongoing application maintenance, replacing legacy code and integrating new features with minimal downtime.

2. Medcom Benefit Solutions — Jacksonville, Florida, USA (Remote)

September 2022 – Present

Medcom is a leading provider of health benefits administration solutions, serving 5,000+ U.S. employers. Contributed as a core Full Stack Developer on the **ACA360 Portal — File Automation System**.

- Engineered large file upload handling with **ClosedXML/OpenXML** and **Hangfire** for asynchronous processing, enabling seamless management of high-volume ACA compliance files without performance degradation.
- Developed employee code calculation engine using **C#** and **Dapper**, integrating complex business logic to automate accurate code generation across thousands of records.
- Implemented pending and risk processing logic with **SQL Server stored procedures** and **REST APIs**, streamlining workflow triage and reducing manual intervention by prioritizing high-risk items.
- Built centralized file generation and download hub leveraging **DataTables** and **AJAX/jQuery**, providing efficient export capabilities for validated ACA forms and reports.
- Designed and deployed role-based permission system supporting 10 distinct roles (**SuperAdmin to StaffAU**), enforcing granular access controls via **ASP.NET Core** identity and custom middleware to secure sensitive employer data and compliance workflows.
- Translated business requirements into **technical specifications** and maintainable code, reducing bug resolution time through strong debugging practices.
- Identified and resolved **code-based security and performance vulnerabilities**, maintaining high application reliability.
- Managed codebase via **GitHub and SourceTree** across multiple build environments (Dev, QA, Production).
- Participated actively in **Agile/Scrum ceremonies** (daily standups, sprint planning, retrospectives), collaborating closely with Product Owner and QA teams.

- Supported ongoing application maintenance, replacing legacy code and integrating new features with minimal downtime.
